Since Smoky is an active mine we could go in the winter. Won't be able to see everything but some things and get a scale of things. Conda would be tough after next week predicted snow.

Thanks, Jeff. Appreciate it! I definitely will want to plan a site visit to Smoky but sounds like that would probably be sometime June-ish after snow melt, is that correct? If adding Conda in at that time would be possible, great.

Best,
Jennifer
